

Local Business Marketing Manifesto

How A Top Ranked Website Will Forever Change Your Business, Get You More Visibility, Get You More Customers, Make You More Money, And Leave 99% Of Traditional Offline Businesses In The Dust....

Having A Top Ranked Website

- Why ignoring or misusing it will cost you businesses
- Why harnessing it correctly will grow your business, no matter what kind of business you have
- How to jump in and take advantage of this growing phenomenon RIGHT NOW

Thank you for downloading this report, I'd like to share with you some information, techniques and resources that 99% of your competitors may not be doing. And the good news is not that they are difficult to do it's just that most businesses don't even know about them..... yet. But first I want to share with you a different approach to finding customers or having customers find you.

The Most Surefire And Effective Way To Sell Someone On Something Is To Find The People Who Don't Need To Be Sold! They already sold themselves on what you have. And when I say "find them," I really mean putting yourself in a position where they can find you. By tapping into demand instead of trying to create it, you're going with the flow of the river rather than trying to paddle upstream. And the great thing about it is, they make it really easy for you to find them.

People who really want something are out there looking for ways to get it. They are not sitting around just hoping that someone will randomly call them or knock on their door or bump into them when they're at work. No. When a person has a true interest in something they read books about it. They flip through magazines relating to it. They do research. They go on Google and browse the web. Looking...Searching...

"They go on Google" (Google is the most popular search engine on the Internet dominating over 50% of the search engine market). You see, having a website isn't going to help your business at all if it doesn't show up extremely high in Google's search results. Anytime a person searches for something on Google, Google will return a page with the top ten websites they consider most relevant to the search term. On the page will be a link to the next page of the second ten most relevant sites, and the third page, and the fourth, etc.

For most searches, Google will find hundreds, if not thousands of websites that have something to do with that term. If you're writing a research paper, or a master's thesis, that's great; you can keep digging through all of the links to find those hidden gems. But guess what? The average person who's looking for a Real Estate Agent, chiropractor, roofer, hair salon or some other local business isn't going to dig through pages and pages of Google's search results. In fact, the vast majority of them aren't even going to click through to page 2. There have been many studies of this very thing, and they all show the same result – most people don't even look at the search results past the first page.

Furthermore, when someone does a Google search for a local business, if your website isn't on that first page of results, the odds are very high that they're NOT going to click on your website to see what you have to offer. You need to have a website but you also need to be found. Because a prospect that goes out of their way to look for information is the best kind of prospect you can have (besides one that's already brought from you). When you're able to capture prospects attention and give them your message as they're in the process of looking for info, searching on Google, you've caught them at the absolute peak of their interest level. They're the hottest they can get. Now you're no longer approaching people. You're attracting them.

For your businesses to thrive in today's marketplace you need a website. Not any website will do. You need a website that highlights your products or services, is attractive, easy to navigate and gets seen by the people in your area who are looking for a business just like yours, the question is will they find you, or will they find your competitors?

In just a few short weeks you can have a nice looking website that's top ranked by Google, and that is going to give you more visibility, more leads and more customers.

RankHighWebsites.com offers a 60 day money back guarantee. If your site does not rank on the first page of Google within 60 days for you local search term you get a full refund.

Get a FREE 30 Second Online Video Ad Just for Giving Us A Try!

RankHighWebsites.com will only work with one type of business in a particular city or area.

Visit <http://www.rankhighwebsites.com/> or call 888-311-Rank to increase your visibility, get more customers and make more money.

Check out some of the statistics for local search below.

MORE PEOPLE ARE SPENDING MORE OF THEIR TIME SEARCHING ON THE INTERNET

"Offline Retail Sales Influenced by Online Research will reach
1\$ Trillion by 2010"
– Jupiter Research Forecasts

"Marketing on the Internet has a lower customer acquisition
cost than any other Marketing Medium ever conceived!
Including Yellow Pages, Billboards, Radio, Television or any of
the other traditional mediums".

"25% of All commercial Internet searches are conducted by
users looking for local merchants"
– Kelsey-Bizrate

"35% of all searches are local."
– DM News

"Local search gets specific and becomes 'better than the Yellow
Pages'."
– NerbyNow

" At a high level the findings affirm the value and importance
of search marketing generally and of integrated search and
display campaigns in particular — on instore sales. Yahoo calls
this ROBO — Research Online Buy Offline. It's the latest in an
increasing body of empirical data, much of it from Yahoo
studies, that show how significant the Internet has become as
a driver of local/offline consumer purchase behavior."

Yahoo study continues

"Consumers exposed to these online techniques were more engaged and spent more in physical stores than otherwise, there was an overall revenue lift of 43% with 88% of that spending occurring Locally"
– Yahoo

To grow your business, and I don't care if it's a local mom and pop shop, or a multimedia conglomerate, you need to be connected. If you're not connected to your market your business will suffer. This report isn't about me. It's about you and what it's going to take to grow your business now and in the future.

YOUR BUSINESS CHALLENGE TODAY

You've heard it before but the way people do business is changing. That's at least sort of true. People still do business with those they know, like and trust. The part that is changing is because there are so many people and so many choices. It's overwhelming. I want a hair cut. Where do I go? I can barely count how many salons, barber shops etc. there are, but I don't know where to get what I want.

So what do I do and what do most people do now?

I turn on my computer.

Go to my favorite search engine, for me it's Google.

There may hundreds if not thousands of pages returned in the search result.

How do I decide?

Do I check 10, 20, 50, 100 pages? I usually check out the first page or two. Studies show that this is quite typical. Most people usually review the first page and some continue on to the second page and then it really drops after that.

How good are the customers that are searching for your product or service. Their worth their weight in gold. They have a want and they are searching for you, you just need to be found, to be right in front of them.

You need to get in front of that flow.

You need to get to the top of the search engine rankings
You're in business for a reason: you have something to offer other people.

The only reason that your business may not be doing as well as it should is because people are looking for you, but they can't find you.

The days of people stumbling across your store are fading, if not gone entirely.

If you have a brick and mortar establishment, maybe you're a licensed professional, a consultant, a traveling salesperson, a professional networker or whatever it is that you do, people aren't driving the way they used to.

Gas prices are higher, and there's more traffic on the road. Drivers are not cruising. They're figuring out point B before leaving the house.

For the past 10 years an increasing number of people have been using search engines to look for businesses in their area. It's called local search and most of those businesses are not listed. This is either because the business doesn't have a web site, or because the web site was put together by somebody who had no ideas what they were doing and it simply can't be found by the search engines.

Perhaps you you're catching up by putting a website up and creating a presence on the Internet.

Technology on the Internet is maturing. People are connecting online are expecting you to be connected as well.

The good news is people are still spending money And they want to buy from someone they trust you can start to build this trust by having a website up allowing them to research your business, but they need to find you first.

GETTING RANKED IN THE SEARCH ENGINES IS EASIER THAN YOU THINK

If you are not on the Internet, your market is shrinking.

That means your income is going down.

If you are on the Internet, you need to be visible. This doesn't require full time work. There are professional services that specialize in just that getting you found. Visit <http://www.rankhighwebsites.com/> for more information.

Heres the bottom line: if you want to grow your business and if you want to maintain good relationships with your existing clients, you need to go where they are going.

Search engines have made it possible for businesses to reach across great distance and to multitude of people in order to promote a product or service.

I think direct marketing is incredibly cool and will serve a purpose well into the future. But once again human beings are creatures that seek out information. And they would much rather go to Google and search out the best coffee shop or the best place to get their oil changed than to simply respond to a flyer they received in the mail.

GETTING HIGH RANKINGS FOR LOCAL SEARCH

Businesses that know the power of search engines have websites created specifically to rank at the top of the search engines. Some of these businesses make enough money to hire a staff to make sure those sites stay at the top of the listings. Usually the cost of having web design company set up a powerful, high ranking web site will cost two - four thousand dollars or more. On top this there is usually a monthly fee varying from \$50-\$300.

That's the bad news.

The good news is <http://www.rankhighwebsites.com/> specializes in getting top rankings for local search they are able to offer it for only \$795.00US and that includes one free year of hosting. They also guarantee page one on Google for local search terms within 60 days or your money back. I have not seen any other company offer such a guarantee.

THE POWER OF THE INTERNET AND SEARCH ENGINES

Successful business owners need to get onto the Internet and generate more customers while taking care of the business they have now.

Search engine traffic is like a giant lead generation machine that works 24 hours a day 7 days a week.

No matter what kind of business you operate you can benefit from getting more traffic from the search engines.

Search engine traffic is:

Where you can make yourself known.

Where you can attract business to you.

It doesn't matter if you sell pizza, if you're a Realtor, a dentist, a chiropractor, a massage therapist, a personal trainer, coffee shop owner, gage door repairman, professional networker, paintball supply owner, photographer, copywriter, landscaper, finish carpenter, computer repair specialist, horse riding instructor, special needs tutor, or involved in any other type of business or pursuit that I either can't think of or feel like mentioning.

The point should be incredibly clear.

No matter who you are you can find more customers through a top ranked website.

You do not need to do it with a lot of keyword research.

Outsource it. You do not need to worry about how to get to the top of search engine rankings. Outsource it.

You do not need specialized technical knowledge. Outsource it.

How do you do this , how do you get detailed keyword research, top Google rankings and all the rest? Outsource.

As previously mentioned only one company that I have seen can offer guaranteed page one ranking on Google for your local search term <http://www.rankhighwebsites.com/> .

At only \$795.00US and a 60 day money back guarantee this is an offer that may not last long. They will only work with one type of business in each local area.

Below I have added a few resources, most of them are free and if used can improve your chances of getting found locally.

MORE RESOURCES TO HELP YOUR LOCAL BUSSINESS

Yelp.com

<http://www.yelp.com/>

Yelp.ca

<http://www.yelp.ca/>

Many small business owners are surprised to find their business listed on Yelp. Sometimes these listings are highly detailed and include numerous reviews from Yelp members. This site is not limited to restaurants. Auto shops, florists, and even churches can be found on this site, along with plenty of customer reviews. This is a great place to engage your customer and also where you can address customer complaints directly. If your business is not listed, create a listing for it but do so honestly as the owner and not as a "fake customer." Review other business in your area. This shows you are a part of the local community and increases your credibility within this powerful social community.

LinkedIn.com

<http://www.linkedin.com/>

Over 30 million professionals use LinkedIn to exchange information, ideas and opportunities.

Any business owner, consultant, job-seeker or professional should have profile on LinkedIn. Use the summary field in the profile to its fullest extent to describe what you do. Invite connections from others.

Every connection through LinkedIn is like a business card exchanged.

However, only give recommendations to other connections if you truly endorse that person. Your own reputation can be tarnished by a mis-given recommendation.

MeetUp.com

<http://www.meetup.com/>

This site may not be applicable for every business but for some its a goldmine of potential customers. Groups of people in your local area all in one place.

Meetup is the world's largest network of local groups. Meetup makes it easy for anyone to organize a local group or find one of the thousands already meeting up face-to-face. More than 2,000 groups get together in local communities each day, each one with the goal of improving themselves or their communities.

Meetup's mission is to revitalize local community and help people around the world self-organize. Meetup believes that people can change their personal world, or the whole world, by organizing themselves into groups that are powerful enough to make a difference.

RankHighWebsites.com

<http://www.rankhighwebsites.com/>

Rank High Websites will custom design your site from the start to Rank High in the Search Engines to get your business noticed.

They will build you an attractive and informative website that Ranks At The Top of The Search Engines for your local business which leads to more exposure, more customers and more profits. FREE online video ad just for giving them a try.

LocalMapQuest.com
<http://local.mapquest.com/>

Find activities, restaurants, and events. Use *MapQuest* to discover movies and entertainment, news, and *local* activities.

Vistaprint.com
www.vistaprint.com/

Vistaprint.ca
www.vistaprint.ca/

VistaPrint is making high-quality graphic design and custom printing convenient and affordable for everyone.

With more than 16 million customers worldwide, VistaPrint is a leading online supplier of high-quality graphic design services and customized printed products to small businesses and consumers. We offer high-quality solution for graphic design and full-color printing in small quantities, without the premium price.

Xing
<http://www.xing.com/>

Global Networking for Professionals.
Over 6 Million members use Xing to manage their business contacts.

Ikarma

<http://www.ikarma.com/>

Based in Jupiter, Florida, iKarma Inc. specializes in providing reputation and customer feedback systems for businesses and professionals. ikarma's mission is to help create prosperity and commerce by bringing greater trust and openness to business transactions.

Yahoo! Local

<http://listings.local.yahoo.com/csubmit/index.php>

Searches locally for whatever you like. Add your business to the listings increasing your chance of being found in your local area when people are searching the internet.

Google Local Business Center

<http://www.google.com/local/add/analyticsSplashPage?gl=US&hl=en-US>

Free listing.

Local customers already search Google for the products and services you offer. Create a business listing to be sure they find you. You can put your business maps as well. Remember its free.

WHAT TO DO NEXT

Stick your head in the sand if you want. Take a nap and sleep through the current economic squeeze.

If you expect to wake up to find the old ways of marketing restored after you wake up, you're going to discover that everything has been changed.

Search Engine traffic has already had a huge impact on how people interact and how business is done. It's only going to change more, so prepare yourself now.

Get started today.

Sincerely,

<http://www.rankhighwebsites.com/>

How Much Will It Cost To Get Started?

How Do I Get Started?

Why Does My Business Need A Top Ranked Website?

Every day there are people in your area using the Internet to find local businesses like yours. If you don't have a website, customers are finding your competitors instead of you! Internet searches are the most commonly used method for customers in your area to find a local business because it is quick, convenient and very informative. They prefer the Internet over Yellow Page or newspaper ads because it's faster and provides more specific information.

This trend will continue to grow as more and more local businesses market online. This places an emphasis on getting your web site up and running now so you can gain more market share!

You want to attract local customers to your business, and owning a Top Ranked Website is the best way for you to bring in new customers. Take a look online and you will see that many of your competitors already have functioning websites.

Don't get left behind and don't waste your money on services that don't deliver! Top Ranked Websites carries the only **MONEY BACK GUARANTEE** in the industry because we know what it takes to get your website Ranked At The Top of The Search Engines!

What Can A Website Do for My Business?

First and foremost, when you get a website from us, it will inform current and new customers that you are in their area and ready to serve them. Your website will inform with pictures and text the services or products you offer, current specials or offers and how to contact you.

Having a website for your business is the best way to inform customers about your business you have. In this day in age customers expect you to have a website, why don't you?

Your new website will market your business in the search engines and online directories 24 hours a day, seven days a week. Your business will be seen at The Top of The Search Engines in your area and by doing this you will bring in More Customers and Make More Money.

How Are Your Websites Different from Other Websites?

Top Rankings are the name of the game when investing in a website. Anyone can post up a website but most frequently they fall 4, 5 or even 10 pages back when a search is run. With Top Ranked Websites we get your website Ranked On The Front Page of The Search Engines!

This not only gives you the obvious advantage of being seen first but those on the front page are typically seen as having the most expertise and best value. We not only give you immediate exposure but we emphasize the qualities that make your business truly attractive!

I Don't Know How To Use The Internet, Can I Still Benefit from A Website?

Absolutely! We will be the ones doing all of the online work to take care of the building and marketing of your website. We take the information that you supply us and do the online work for you.

You don't need to know the first thing about the Internet. All you need to know is that we will build you a website you will be proud of and people in your area are going to find it!

If you *are* Internet savvy, you can take advantage of some of the Internet Marketing Tips we will supply you with.

What's Included With My Website?

A Powerful Domain Name That Is Easy To Remember and Projects A Powerful Image for Your Company

We carefully select the right domain name for the type of business you are in. If you are a Contractor in Fitchburg or a Hair Salon in Worcester, you want to have a website address that is easy to remember and emphasizes the services you perform and the areas you work in. This allows you to add your website address to all of your printed material such as your business cards, invoices and brochures.

Having your website address on all of your printed material is going to give current and potential customers more information about your company and help you stay in front of them!

We even help you get off to a great start by giving you **250 FREE Business Cards!**

An Eye-Catching and Informative Website That Is Designed To Showcase Your Business and Bring In New Customers

We will design your site to compliment the look of your current marketing material and can incorporate your logo and it's colors into your new website. We will design your site from the start to attract new customers and it will be something to really be proud of.

One of the nicest things about a website is that you aren't limited by space restrictions so you can really showcase your business. Your website will have an attractive, and easy to navigate layout that features your company information, how to contact you, the services you offer, and can have pictures of your business, products or staff.

Your new website can also include customer testimonials, links to other sites and any other information you would like. Your website also features a contact form that allows you to stay in touch with clients and can really flood your business with new customers.

Rather than go on about all the great things your website will have, take a look at some of the sites on the next page to get an idea of how your site can look. Remember your site will be totally customized for your business and can feature your logo and the colors you like.

This is just a small sample of our work. As you can see, we can help almost any type of business. Your website will be customized for your business and will reflect the high quality and service you offer.

What will truly make your website special is the fact that it will be **Ranked At The Very Top of The Search Engines** and that is going to give you **more visibility, more customers and more profits!**
